Top 10 cities to find a Web Developer job in Q1 2011

How is that Cambridge, MA, is ranked 1st as the best place to look for a Web Developer job?

Cambridge has 5.8 job listings for Web Developer jobs per 1,000 residents, thus making it the easiest city to find a job. Although there are more Web Developer job listings in New York (6,176) compared to any other city, the Big Apple does not even rank in the top 50 easiest places to find a Web Developer job.

How was the population determined?

Using the data provided by the United States Census Bureau on July 1, 2009, a list was created for all cities with a population of 100,000 or more. 276 cities were incorporated in the list.

How were job listings determined?

Web Developer job listings for each city's exact location was retrieved from online job aggregator Indeed.com on March 2, 2011. As you can see below, there were 630 Web Developer job listings in Cambridge, MA. Rankings were then determined by calculating the number of job postings per thousand people in each city.

NOTE: Cities that did not have at least 5 Web Developer job listings were not included in the rankings. In all, 33 cities did not have at least 5 Web Developer job listings on March 2, 2011.

The screenshot shows the Indeed search interface. The search bar contains 'web developer' and the location bar contains 'Cambridge'. The 'Exact location only' filter is selected and circled in green. The results show 'web developer jobs in Cambridge, MA' and 'Jobs 1 to 10 of 630', with the number '630' also circled in green.

Since a job opening can be listed in more than one place and can remain online for a time after it is filled, this study does not reflect a precise outlook at where the Web Developer jobs are. Nevertheless, the numbers do present a strong case for which cities are the easiest and hardest for finding a Web Developer job.

What is the easiest way to hear about a Web or Mobile Developer job?

In just 30 seconds, web and mobile programmers can register to receive mobile job alerts for free at FoneGigs. SMS job alerts for new web / mobile programming gigs in or near their area code will be delivered straight to their mobile phone. Participation is easy, just sign up at FoneGigs.mobi or text 'FoneGigs' to 41-411.

Complete list of cities and their ranking below along with data for iPhone and Android Developer gigs on pages 7-15.
